

AUTHOR INDEX

Under each name are listed, in chronological order of publication, all articles in which an author has participated.

Abdelmessih, S.

Treatment of singularities in scattering from perfectly conducting polygonal cylinders—a numerical technique. S. Abdelmessih and G. Sinclair, 1305.

Agrawal, V. K.

On the polar impurities trapped in an ionic crystal matrix. S. Chandra and V. K. Agrawal, 2489.

Alexander, H.

Dislocation distribution in deformed germanium. H. Alexander and P. Haasen, 1209.

Alexander, T. K.

Study of some ^{20}Ne levels by radiative capture. A. E. Litherland, R. W. Ollerhead, P. J. M. Smulders, T. K. Alexander, C. Broude, A. J. Ferguson, and J. A. Kuehner, 1901.

Weak gamma-ray transitions in ^{20}Ne . C. Broude, A. E. Litherland, R. W. Ollerhead, and T. K. Alexander, 3837.

Allin, E. J.

An intensity anomaly in the Raman spectra of solid and liquid hydrogen and deuterium. A. H. McKague Rosevear, G. Whiting, and E. J. Allin, 3589.

Almqvist, E.

New high-spin levels in ^{20}Ne . J. A. Kuehner and E. Almqvist, 1605.

Antolin, J.

Investigations on some deformation modes of beryllium. J. P. Poirier, J. Antolin, and J. M. Dupouy, 1221.

Apparao, K. V. S. R.

Structure of the band spectrum of the CuBr molecule. I. Rotational structure of the C system of $^{63}\text{Cu}^{81}\text{Br}$. P. Ramakoteswara Rao and K. V. S. R. Apparao, 2805.

Archer, N. P.

The $^{51}\text{V}(n, \gamma)^{52}\text{V}$ reaction. N. P. Archer and T. J. Kennett, 2683.

The spin and magnetic moment of cesium-138. G. M. Stinson, N. P. Archer, J. C. Waddington, and R. G. Summers-Gill, 3393.

Armstrong, R. L.

Spin-lattice relaxation in solutions of electrolytes. I. Relaxation of ^7Li and ^{23}Na in aqueous solutions of alkali halides. P. A. Speight and R. L. Armstrong, 2493.

Arnett, D.

Mass dependence in gravitational collapse of stellar cores. D. Arnett, 1621.

Arnett, W. D.

Erratum: Gravitational collapse and weak interactions. W. D. Arnett, 1962.

Nucleosynthesis in supernova shock waves. J. W. Truran, W. D. Arnett, and A. G. W. Cameron, 2315.

Supernova hydrodynamics and nucleosynthesis. W. D. Arnett and A. G. W. Cameron, 2953.

Arnold, S. J.

Some reactions forming $\text{O}_2(^1\Sigma_g^+)$ in the upper atmosphere. S. J. Arnold and E. A. Ogryzlo, 2053.

Arora, A. K.

Nonlinear demodulation of an amplitude-modulated electromagnetic wave in a plasma. S. Ram and A. K. Arora, 2543.

Arora, H. L.

Thermalization time of positrons in metals. J. P. Carbotte and H. L. Arora, 387.

Arora, R. K.

Field of a line source situated parallel to a surface-wave structure comprising a pair of unidirectionally conducting screens. R. K. Arora, 2145.

Atherton, D.

Measurement of low joint resistance between superconductors. D. Atherton, 2809.

Aziz, R. A.

Measurements of the velocity of sound in liquid argon and liquid krypton. C. C. Lim and R. A. Aziz, 1275.

Baker, J. M.

EPR spectra of pairs of interacting rare-earth ions. J. M. Baker and A. E. Mau, 403.

Bansal, N. K.

On the calculation of the fundamental mode of the one-velocity neutron transport operator. N. K. Bansal and A. K. Ghatak, 3793.

Barker, J. A.

Square-well fluid at low densities. J. A. Barker and D. Henderson, 3959.

Barnett, D. M.

The stresses produced by a screw dislocation pileup at a circular inclusion of finite rigidity. D. M. Barnett and A. S. Tetelman, 841.

Barnett, G. P.

Wave functions for the $^1\Sigma_g^+$ ground state of the He_2 molecule. G. P. Barnett, 137.

Baron, R.

Ion implantation of silicon. II. Electrical evaluation using Hall-effect measurements. J. W. Mayer, O. J. Marsh, G. A. Shifrin, and R. Baron, 4073.

Barrie, R.

The temperature dependence of the energy levels of shallow donor impurities in silicon. C. Y. Cheung and R. Barrie, 1421.

Barrington, R. E.

Some characteristics of the lower hybrid resonance noise bands observed by the Alouette I satellite. D. J. McEwen and R. E. Barrington, 13.

Plasma-induced interference in satellite v.l.f. receivers. F. J. F. Osborne, F. H. C. Smith, R. E. Barrington, and W. E. Mather, 47.

Bartholomew, G. A.

The $^{199}\text{Hg}(n,\gamma)^{200}\text{Hg}$ reaction with thermal neutrons. G. A. Bartholomew, S. I. H. Naqvi, M. R. Gunye, and E. D. Earle, 1517.

Multipolarities of primary γ rays in $^{199}\text{Hg}(n,\gamma)^{200}\text{Hg}$ and parities of levels in ^{200}Hg . G. A. Bartholomew, M. R. Gunye, and E. D. Earle, 2063.

Barton, R.

The half-lives of the 243-keV and 188-keV levels in ^{125}I . Y. S. Horowitz, R. B. Moore, and R. Barton, 101.

Basinski, J.

Ionization energy and impurity band conduction of shallow donors in n-gallium arsenide. J. Basinski and R. Olivier, 119.

Basinski, Z. S.

Latent hardening and the flow stress in copper single crystals. P. J. Jackson and Z. S. Basinski, 707.

Resistivity of deformed crystals. Z. S. Basinski and S. Saimoto, 1161.

Batra, I. P.

Phonon-assisted magnetoabsorption in direct-band semiconductors. I. P. Batra and R. R. Haering, 3401.

Beaudet, P. R.

Negative photoconductivity and electrical instabilities in semiconductors. B. L. Jones and P. R. Beaudet, 4091.

Beer, G. A.

The electron-scattering facility at the Saskatchewan accelerator laboratory. L. Katz, G. A. Beer, D. E. McArthur, and H. S. Caplan, 3721.

Berkal, A.

Deviation of observed muon direction from primary direction due to geomagnetic field. A. Berkal, E. K. L. Hung, and H. R. Coish, 4113.

Bernier, J.-P.

Effects of pairing in the ^{20}Ne nucleus. C. S. Kalman, J.-P. Bernier, and M. Harvey, 1297.

Berry, R. J.

Ideal resistivity of platinum below 20 °K. R. J. Berry, 1693.

Two-band conduction in Pt, W, and Pb. R. J. Berry, 2525.

Bertie, J. E.

Erratum: Infrared reflection of heavily doped p-type gallium arsenide. H. D. Riccius and J. E. Bertie, 3188.

Bhatia, M. S.

On the dielectric constant of the high-density charged Bose gas and the validity of the Bohm-Pines assumption. M. S. Bhatia, 2223.

Bhatnagar, K. L.

Effect of ion sheath on radiation in a magnetoionic medium. II. Source current perpendicular to the magnetostatic field. S. R. Seshadri and K. L. Bhatnagar, 279.

Richard, J. W.

The temperature dependence of the half-widths of internal absorption lines in boron-doped silicon. R. R. Parsons and J. W. Richard, 2879.

Birgeneau, R. J.

Tables of matrix elements of Racah operator equivalents. R. J. Birgeneau, 3761.

Blenkinsop, J.

A method for digital recording for mass spectra. D. H. Weichert, R. D. Russell, and J. Blenkinsop, 2609.

Bloom, M.

Observation of the transverse Stern-Gerlach effect in neutral potassium. M. Bloom, E. Enga, and H. Lew, 1481.

Determination of the spin-rotation interaction constants in CH_4 by means of nuclear spin relaxation measurements. M. Bloom and R. Dorothy, 3411.

Nuclear spin relaxation in gaseous methane and its deuterated modifications. M. Bloom, F. Bridges, and W. N. Hardy, 3533.

- Bolling, G. F.**
The effect of solute on slip and mechanical twinning in iron alloys. G. F. Bolling and R. H. Richman, 541.
- Bolton, R.**
Characteristics of a toroidal resonator for plasma diagnostics. M. Šícha, G. G. Cloutier, and R. Bolton, 3979.
- Bowen, D. K.**
Deformation properties of niobium single crystals. D. K. Bowen, J. W. Christian, and G. Taylor, 903.
- Bowman, J. J.**
High-frequency backscattering from an absorbing infinite strip with arbitrary face impedances. J. J. Bowman, 2409.
- Brancazio, P. J.**
Abundance anomalies produced by nuclear reactions in stellar surface layers. I. Nuclear-reaction rates. P. J. Brancazio, A. Gilbert, and A. G. W. Cameron, 3275.
Abundance anomalies produced by nuclear reactions in stellar surface layers. II. Results and comparison with anomalies in peculiar A stars. P. J. Brancazio and A. G. W. Cameron, 3297.
- Breithaupt, R. W.**
Bistatic scattering by a thin, lossy cylindrical wire. R. W. Breithaupt, 1965.
- Bridges, F.**
Nuclear spin relaxation in gaseous methane and its deuterated modifications. M. Bloom, F. Bridges, and W. N. Hardy, 3533.
- Brodie, D. E.**
Some dielectric and electronic properties of CdSe films. D. E. Brodie and J. LaCombe, 1353.
- Brooker, W. H.**
The g factor of the 603-keV level in ^{124}Te . J. Murray, T. A. McMath, W. H. Brooker, and J. A. Cameron, 1600.
- Broude, C.**
Study of some ^{20}Ne levels by radiative capture. A. E. Litherland, R. W. Ollerhead, P. J. M. Smulders, T. K. Alexander, C. Broude, A. J. Ferguson, and J. A. Kuehner, 1901.
Properties of the 7.02-MeV and 10.65-MeV levels of ^{20}Ne . P. J. M. Smulders, C. Broude, and A. E. Litherland, 2133.
Doppler-shift attenuation calculations for low recoil velocities. C. Broude, 3415.
Weak gamma-ray transitions in ^{20}Ne . C. Broude, A. E. Litherland, R. W. Ollerhead, and T. K. Alexander, 3837.
- Brown, J. S.**
Anharmonic contributions to the bulk modulus and characteristic temperatures of neon and argon at $T = 0^\circ\text{K}$. J. S. Brown and G. K. Horton, 2995.
- Brown, L. M.**
Wulfi's theorem and certain Green's functions in dislocation theory. L. M. Brown, 893.
- Buckmaster, H. A.**
A 9-GHz, single-klystron, EPR spectrometer using superheterodyne demodulation. H. A. Buckmaster and J. C. Dering, 107.
- Budzinski, E. E.**
Rocket observations of electron pitch-angle distributions during auroral substorms. I. B. McDiarmid, E. E. Budzinski, B. A. Whalen, and N. Schopke, 1755.
Rocket measurements in proton aurora. B. A. Whalen, I. B. McDiarmid, and E. E. Budzinski, 3247.
- Bunker, P. R.**
Normal modes, Coriolis coupling, and centrifugal distortion in molecules with nearly free internal rotation: $\text{CH}_3\text{—C}\equiv\text{C—CH}_3$ and $\text{CH}_3\text{—C}\equiv\text{C—SiH}_3$. P. R. Bunker and J. T. Hougen, 3867.
- Burrows, J. R.**
Dependence of the position of the outer radiation zone intensity maxima on electron energy and magnetic activity. I. B. McDiarmid and J. R. Burrows, 2873.
- Burrows, M. L.**
A reformulated boundary perturbation theory in electromagnetism and its application to a sphere. M. L. Burrows, 1729.
- Byron, J. F.**
Orientation dependence of yield in body-centered cubic metals. D. Hull, J. F. Byron, and F. W. Noble, 1091.
- Calvo, C.**
Alpha-beta phase transition in Mn^{2+} -doped $\text{Mg}_2\text{P}_2\text{O}_7$. Z. Melkvi, C. V. Stager, and C. Calvo, 83.
- Cameron, A. G. W.**
Nucleosynthesis in supernova shock waves. J. W. Truran, W. D. Arnett, and A. G. W. Cameron, 2315.

- Supernova hydrodynamics and nucleosynthesis. W. D. Arnett and A. G. W. Cameron, 2953.
- Abundance anomalies produced by nuclear reactions in stellar surface layers. I. Nuclear-reaction rates. P. J. Brancazio, A. Gilbert, and A. G. W. Cameron, 3275.
- Abundance anomalies produced by nuclear reactions in stellar surface layers. II. Results and comparison with anomalies in peculiar A stars. P. J. Brancazio and A. G. W. Cameron, 3297.
- Early and main sequence evolution of stars in the range 0.5 to 100 solar masses. D. Ezer and A. G. W. Cameron, 3429.
- Evolution of stars of low mass. D. Ezer and A. G. W. Cameron, 3461.
- Cameron, J. A.**
- The g factor of the 633-keV level in ^{188}Os . J. Murray, T. A. McMath, and J. A. Cameron, 1597.
- The g factor of the 603-keV level in ^{124}Te . J. Murray, T. A. McMath, W. H. Brooker, and J. A. Cameron, 1600.
- Nuclear g factor of the first excited state in ^{106}Pd and the internal field on palladium in nickel. J. Murray, T. A. McMath, and J. A. Cameron, 1813.
- Nuclear g factors of the first excited states of ^{76}Se and ^{122}Te . J. Murray, T. A. McMath, and J. A. Cameron, 1821.
- Campbell, C. K.**
- Tunneling investigation of energy-gap anisotropy in superconductors. C. K. Campbell and D. G. Walmsley, 159.
- Observations on paramagnetic cooling with synthetic ruby. C. K. Campbell and R. H. Hum, 1413.
- Tunneling measurements on superconductors with isotropic energy gaps. D. G. Walmsley and C. K. Campbell, 1541.
- Caplan, H. S.**
- The electron-scattering facility at the Saskatchewan accelerator laboratory. L. Katz, G. A. Beer, D. E. McArthur, and H. S. Caplan, 3721.
- Carbotte, J. P.**
- Thermalization time of positrons in metals. J. P. Carbotte and H. L. Arora, 387.
- Carette, J.-D.**
- Ionisation par impact électronique de CO_2 et N_2O . J.-D. Carette, 2931.
- Carlin, J.**
- Acoustic waves and their effects on antenna impedance. J. Carlin and R. Mittra, 1251.
- Champness, C. H.**
- Thermoelectric properties of n-type Bi_2Te_3 - Bi_2Se_3 alloys. C. H. Champness, W. B. Muir, and P. T. Chiang, 3611.
- Chandra, S.**
- On the polar impurities trapped in an ionic crystal matrix. S. Chandra and V. K. Agrawal, 2489.
- Channing, D. A.**
- Effect of temperature on the penetration of heavy keV ions in monocrystalline solids. I. ^{133}Xe ions in gold. D. A. Channing, 2455.
- Effect of temperature on the penetration of heavy keV ions in monocrystalline solids. II. Various ions in gold, aluminium, and tungsten. L. M. Howe and D. A. Channing, 2467.
- Chatterjee, R.**
- Crystalline field theory of Ni^{2+} complexes. R. Chatterjee, 2121.
- Cheung, C. Y.**
- The temperature dependence of the energy levels of shallow donor impurities in silicon. C. Y. Cheung and R. Barrie, 1421.
- Chevrier, J. C.**
- The nature and formation of bands of deformation in single crystals of α -phase copper-aluminium alloys. J. W. Mitchell, J. C. Chevrier, B. J. Hockey, and J. P. Monaghan, Jr., 453.
- Chiang, P. T.**
- Thermoelectric properties of n-type Bi_2Te_3 - Bi_2Se_3 alloys. C. H. Champness, W. B. Muir, and P. T. Chiang, 3611.
- Chou, Y. T.**
- Dislocation pileups and the Hall-Petch relation. Y. T. Chou, 559.
- Christian, J. W.**
- Deformation properties of niobium single crystals. D. K. Bowen, J. W. Christian, and G. Taylor, 903.
- Christmas, P.**
- Electron spectra in the decay of thallium-204. J. J. H. Park and P. Christmas, 2621.
- Chuang, S. Y.**
- Momentum distributions of two photon annihilating positron-electron pairs in hexane and decane. S. Y. Chuang and B. G. Hogg, 3895.

- Clarebrough, L. M.**
Faulted defects and stacking-fault energy. L. M. Clarebrough, P. Humble, and M. H. Loretto, 1135.
- Clements, R. M.**
Experimental investigation of Langmuir probes. R. M. Clements and H. M. Skarsgard, 3199.
- Cloutier, G. G.**
Characteristics of a toroidal resonator for plasma diagnostics. M. Šícha, G. G. Cloutier, and R. Bolton, 3979.
- Cohen, M.**
Hartree-Fock wave functions for excited states. III. Dipole transitions in three-electron systems. M. Cohen and P. S. Kelly, 1661.
Asymptotic large- Z atomic oscillator strengths. M. Cohen, 2009.
Hartree-Fock wave functions for excited states. IV. Oscillator strengths in the helium isoelectronic sequence. M. Cohen and P. S. Kelly, 2079.
Approximate molecular orbitals. III. The $1s\delta$ and $2p\pi$ states of HeH^{++} . M. Cohen, R. P. McEachran, and S. D. McPhee, 2231.
Approximate molecular orbitals. IV. The $3d\delta_g$ and $4f\delta_u$ states of H_2^+ . M. Cohen, R. P. McEachran, and S. D. McPhee, 2533.
Approximate molecular orbitals. V. The $3d\delta$ state of HeH^{++} . M. Cohen, R. P. McEachran, and S. D. McPhee, 2749.
Bounds on atomic dipole polarizabilities. M. Cohen, 3387.
Multiple polarizabilities and shielding factors of the helium isoelectronic sequence. M. Cohen, 3773.
- Coish, H. R.**
Deviation of observed muon direction from primary direction due to geomagnetic field. A. Berkai, E. K. L. Hung, and H. R. Coish, 4113.
- Colbow, K.**
Photoluminescence efficiency and photoconductivity in cadmium sulfide. D. W. Nyberg and K. Colbow, 2833.
Photoluminescence in CdS associated with nitrogen impurities. D. W. Nyberg and K. Colbow, 3333.
- Coleman, A. J.**
Infinite range correlation and large eigenvalues of the 2-matrix. A. J. Coleman, 1271.
- Colenbrander, A. H.**
A study of the gamma radiation following neutron capture in copper. A. H. Colenbrander and T. J. Kennett, 2395.
- Colin, R.**
The $b^1\Sigma^+-X^3\Sigma^-$ band system of NCl . R. Colin and W. E. Jones, 301.
- Connor, R. D.**
Studies in the decay of the active deposit of actinium. III. Levels in ^{211}Bi and its daughter products. W. F. Davidson, C. R. Cothorn, and R. D. Connor, 2295.
- Conrad, H.**
Thermally activated deformation of α titanium below $0.4 T_M$. H. Conrad, 581.
- Cook, G. R.**
Photoionization and absorption coefficients of NO in the 600 to 950 Å region. P. H. Metzger, G. R. Cook, and M. Ogawa, 203.
- Cothorn, C. R.**
Studies in the decay of the active deposit of actinium. III. Levels in ^{211}Bi and its daughter products. W. F. Davidson, C. R. Cothorn, and R. D. Connor, 2295.
- Cottrell, A. H.**
The theoretical strengths of crystals and the tip of a crack. A. Kelly, W. R. Tyson, and A. H. Cottrell, 883.
- Creutzberg, F.**
Triplet-state rotational energy levels for near-symmetric rotor molecules of symmetry C_{2v} , D_2 , and D_{2h} . F. Creutzberg and J. T. Hougen, 1363.
- Cross, W. G.**
The distribution of absorbed energy from a point beta source. W. G. Cross, 2021.
- Dagg, I. R.**
The dielectric constant of bromine at microwave frequencies. I. R. Dagg, G. E. Reesor, and R. P. Doble, 2349.
- Dasannacharya, B. A.**
Cold neutron scattering by liquid methane. K. R. Rao, G. Venkataraman, and B. A. Dasannacharya, 3185.
- Davidson, W. F.**
Studies in the decay of the active deposit of actinium. III. Levels in ^{211}Bi and its daughter products. W. F. Davidson, C. R. Cothorn, and R. D. Connor, 2295.
- Davies, J. A.**
Ranges of Na, K, Kr, and Xe ions in amorphous Al_2O_3 in the energy region 40–1 000 keV. P. Jespersgård and J. A. Davies, 2983.

- Ion implantation of silicon. I. Atom location and lattice disorder by means of 1.0-MeV helium ion scattering. J. A. Davies, J. Denhartog, L. Eriksson, and J. W. Mayer, 4053.
- Dayal, B.**
Specific heats of potassium iodide by a modified shell model. R. G. Deo and B. Dayal, 1885.
Specific heats and dispersion curves for CsCl on the basis of the shell model. G. P. Srivastava and B. Dayal, 3339.
- Denhartog, J.**
Ion implantation of silicon. I. Atom location and lattice disorder by means of 1.0-MeV helium ion scattering. J. A. Davies, J. Denhartog, L. Eriksson, and J. W. Mayer, 4053.
- Deo, R. G.**
Specific heats of potassium iodide by a modified shell model. R. G. Deo and B. Dayal, 1885.
- Dering, J. C.**
A 9-GHz, single-klystron, EPR spectrometer using superheterodyne demodulation. H. A. Buckmaster and J. C. Dering, 107.
- deSobrinho, L.**
On the kinetic theory of a Van der Waals gas. L. de Sobrinho, 363.
Kinetic equation for a gas with long-range attraction. R. A. Elliott and L. de Sobrinho, 3555.
- Devaraj, N.**
The surface tension of liquid helium I and the law of corresponding states. N. Devaraj and A. C. Hollis Hallett, 2113.
- Dibbs, H. P.**
Electrotransport in single-crystal bismuth telluride. H. P. Dibbs and J. D. Keys, 3945.
- Dickie, L. O.**
Hyperfine structure in the ground configuration of bismuth. L. O. Dickie and F. M. Kelly, 2249.
- Doble, R. P.**
The dielectric constant of bromine at microwave frequencies. I. R. Dagg, G. E. Reesor, and R. P. Doble, 2349.
- Dodson, C. T. J.**
A partial analysis of a nonlinear electromechanical system, the exploding loop. C. T. J. Dodson, 145.
Second integrals for the exploding loop. C. T. J. Dodson, 3414.
- Donohoe, J.**
Electron decay following d-c. discharge ionization in NO and NO-Ne mixtures. M. H. Mentzoni and J. Donohoe, 1565.
- Dorn, J. E.**
A critical review of the Peierls mechanism. P. Guyot and J. E. Dorn, 983.
- Dorothy, R.**
Determination of the spin-rotation interaction constants in CH₄ by means of nuclear spin relaxation measurements. M. Bloom and R. Dorothy, 3411.
- Drolet, M.**
High-precision indium resistance thermometers. J. F. Kos, M. Drolet, and J. L. G. Lamarche, 2787.
- Duesbery, M. S.**
The deformation of niobium single crystals. R. A. Foxall, M. S. Duesbery, and P. B. Hirsch, 607.
- Duncan, T. R.**
Dissociated dislocations and the Schmid law of resolved shear stress in b.c.c. metals. F. R. N. Nabarro and T. R. Duncan, 939.
- Dupouy, J. M.**
Investigations on some deformation modes of beryllium. J. P. Poirier, J. Antolin, and J. M. Dupouy, 1221.
- Dvořák, V.**
Interaction of acoustic waves with polarization waves in ferroelectrics. V. Dvořák, 3903.
- Dyer, G. L.**
On the hyperfine structure of trivalent chromium in a cubic environment. G. A. Woonton and G. L. Dyer, 2265.
Investigation of the hyperfine structure of divalent manganese in a magnesium oxide lattice. G. L. Dyer and G. A. Woonton, 2975.
- Earle, E. D.**
The $^{199}\text{Hg}(n,\gamma)^{200}\text{Hg}$ reaction with thermal neutrons. G. A. Bartholomew, S. I. H. Naqvi, M. R. Gunye, and E. D. Earle, 1517.
Multipolarities of primary γ rays in $^{199}\text{Hg}(n,\gamma)^{200}\text{Hg}$ and parities of levels in ^{200}Hg . G. A. Bartholomew, M. R. Gunye, and E. D. Earle, 2063.
- Eisenberg, J. M.**
Effects of strong interactions and finite nuclear charge radius in pionic atoms. L. P. Fulcher, J. M. Eisenberg, and J. LeTourneux, 3313.
- Elliott, R. A.**
Kinetic equation for a gas with long-range attraction. R. A. Elliott and L. de Sobrinho, 3555.

- Enga, E.**
Observation of the transverse Stern-Gerlach effect in neutral potassium. M. Bloom, E. Enga, and H. Lew, 1481.
- Eriksson, L.**
Ion implantation of silicon. I. Atom location and lattice disorder by means of 1.0-MeV helium ion scattering. J. A. Davies, J. Denhartog, L. Eriksson, and J. W. Mayer, 4053.
- Escaig, B.**
On the role of stacking faults in some problems of glide and twinning in cubic metals. B. Escaig, G. Fontaine, and J. Friedel, 481.
- Eshelby, J. D.**
The interpretation of terminating dislocations. J. D. Eshelby and T. Laub, 887.
- Ezer, D.**
Early and main sequence evolution of stars in the range 0.5 to 100 solar masses. D. Ezer and A. G. W. Cameron, 3429.
Evolution of stars of low mass. D. Ezer and A. G. W. Cameron, 3461.
- Fallieros, S.**
Transition densities of dipole excitations in nuclei with $N > Z$. B. Goulard and S. Fallieros, 3221.
- Farach, H. A.**
Spectroscopic line analysis using a Gaussian and Lorentzian convolution technique. H. A. Farach and H. Teitelbaum, 2913.
- Ferguson, A. J.**
Study of some ^{20}Ne levels by radiative capture. A. E. Litherland, R. W. Ollerhead, P. J. M. Smulders, T. K. Alexander, C. Broude, A. J. Ferguson, and J. A. Kuehner, 1901.
- Fisher, R. M.**
Microplasticity detected by an acoustic technique. R. M. Fisher and J. S. Lally, 1147.
- Fontaine, G.**
On the role of stacking faults in some problems of glide and twinning in cubic metals. B. Escaig, G. Fontaine, and J. Friedel, 481.
- Foreman, A. J. E.**
Dislocation movement through random arrays of obstacles. A. J. E. Foreman and M. J. Makin, 511.
- Forman, A.**
Electron paramagnetic resonance of manganese in cesium and ammonium chlorides. A. Forman and J. A. van Wyk, 3381.
- Forsyth, P. A.**
Rocket studies of isolated ionospheric irregularities. K. H. Mason, E. H. Tull, and P. A. Forsyth, 3065.
- Fourie, J. T.**
The plastic deformation of thin copper single crystals. II. An electron microscope study of the surface structure. J. T. Fourie, 777.
- Foxall, R. A.**
